(54) Title: **A PELLET OF PLANT SEED, A METHOD OF PELLETIZATION AND A CULTIVATION METHOD OF PLANTS USING THE SAME**

[Note]

A: preparing pellet shape, drying and making a inserting hole.
B: inserting the plant seed through the hole.
C: pressing and sealing the inserting hole.

(57) Abstract: The present invention relates to a pelletization method of plant seed by mixing fertilizer, plant growth regulator, bactericide and insecticide with peatmoss, forming and drying said mixture, inserting the plant seed into it, pressing and sealing those and then obtaining the resulted pellet with plant seed. The present invention makes it possible to provide a pellet with plant seed being great in plant growing after germination by preventing physiological reaction of seed from removal of water. Also, the present invention can be used for bulbous plants and is not necessary to cover with earth on those after sowing seeds in a soil surface.
